8/10/48.

Discussed with Director of Public Health on the phone. He does not consider the situation to be so serious in city and outside as to justify the measures A & B suggested in the telegrams interfering exist the liberty of persons to go by rail where they please. As far as I can see, no provision exis in the Madras Public Health Act for such action. Its' this for Mysore Government to take necessary action to see that anyone coming for Madras is prevented from spreading any infection. Th they can do by insisting on such persons producing a valid certificate of inoculation, failing which they will not be permitted to enter Mysore or they will be inoculated on entry i Mysore and kept under watch during the necessary period thereaf This is what is usually done in similar cases, We can arrange, the inoculations certificates and also publish the fact at A above everyday, with through the newpapers and through the District Magistrates. The Director of Public Health stated that he could get into touch with the Corppration Health Officer and on firm that the situation is not so serious.
